

ENVIRONMENTAL POLICY

AB Euroform is committed to active environmental efforts and continuous improvement. Through realistic and concrete environmental objectives, we shall work towards a circular approach and the economization of natural resources. Our ambition is to strive for the smallest possible environmental impact. This must be done by:

At all levels, economizing on energy and material resources and recycling residual products. Increasing the use of renewable energy sources in our operations.

Implementing measures to reduce greenhouse gas emissions and striving for decarbonization across our operations.

Applying a system aimed at preventing environmental impact and promoting sustainability.

Training and engaging all employees in environmental work to foster a culture of environmental responsibility.

Complying with environmental legislation and other requirements that society places on us.

Considering environmental risks when purchasing raw materials, machinery, equipment, and managing waste to ensure responsible consumption and waste reduction.

Striving for the responsible consumption of water resources at all levels of our operations. Implementing measures to safeguard and enhance water quality, ensuring that our activities do not degrade the quality of local water sources.

Continuously seeking ways to improve the quality of the air in the areas where we operate.

Adhering to responsible chemical management practices throughout our operations, from procurement to disposal.

Promoting biodiversity and responsible land use to prevent deforestation and soil degradation.

Implementing measures to minimize noise emissions from our operations.

Ensuring that our activities do not harm animal welfare.
